

Think about ...

Eating Well

I HAD MORE
ENERGY
WHEN I
WATCHED
WHAT I ATE

IT'S HARD
TO CUT DOWN
EATING CRISPS
AND
SWEETS

**STOP THE
HUNGER**

with wholegrain
breakfast cereal,
wholemeal or
wheaten bread or,
brown rice

**YOU CAN
MISTAKE THIRST
FOR HUNGER!**

What we eat impacts on our health. It is important to eat a wide variety of foods to get the nutrients we need. The eatwell plate shows the five food groups and the proportions of each we need to eat to achieve a healthy, balanced diet.

Think about ... **Eating Well**

Eating well
is one of the most important
things we can do to stay healthy.

Remember!

- Always have breakfast
- Eat fruit and vegetables - at least five portions a day
- Base meals on foods like bread, potatoes, rice or pasta
- Eat moderate amounts of red meat, eggs, beans and other non-dairy sources of protein.
- Try to eat fish more often, including one portion of oily fish each week
- Choose lower fat versions of milk and dairy foods
- Eat fewer burgers, sausage rolls, chips, pastry, crisps, cakes, biscuits, chocolate, and desserts.
- Drink plenty of water
